

# TOMIHAWK TRAILER

## Transport Trailer for Diesel Kettles, Applicators and Removers

The Tomihawk is a dedicated vehicle to transport and melt thermoplastic road striping material.

The Tomihawk Trailer can be built for all Kettle capacities and configurations. Your choice of applicators, line removal equipment and a hoist to fit your exact needs.

As a feed truck, it can also function as a completely self-contained Kettle work station plus transport walk-behind application and removal equipment. You can set up a twin Kettle layout configuration in sizes up to 1500 LB's.

The Tomihawk Trailer is made of the strongest gauge steel available. We use one whole sheet of steel (solid form tread). This trailer is set up for Diesel auxiliary power.

Featuring a "state of the art" TRI - COOL hydraulic tank system.

Deck Dimensions: 15' L X 8' W X 35" H      Brakes: Electric  
(457.2 cm L X 243.84 cm W 88.9 cm H)      Jack stand: Screw Type  
Diamond plate deck  
Engine Mount: in Tongue    GVW 12,000 Lbs (5682 Kg)  
Tandem Axle LP Fuel Tank Stand or Diesel Fuel Tank
