THERMOPLASTIC MELTING AND SUPPLY KETTLE

Features:

- ▶ Diesel-Fired / Air Jacketed Kettles available
 - ▶ Single or Dual Kettle options
- ▶ Customized kettle size from 1000lb–3000lb available
- ▶ Our new kettles offer an improved heating system that will heat material 20% faster than the prior generation.
 - ▶ *New:* Ergonomic / Octagon shaped kettles
- ▶ Kettle Insulation is non-compressing, so it won't settle over time.
- ▶ *New* “bag shredder” punctures bags for a faster melt.
- ▶ Patented Studs on agitator distribute/mix the bag to blend for a faster/improved melt time.
- ▶ Diesel-Fired flame system is designed so no open flame hits bottom of kettle to prevent scorching of material.
- ▶ Constructed with heavy gauge steel
- ▶ Variable-speed agitation with forward and reverse action for optimum blending
- ▶ Anti-Splash Safety Door
